

Post-doctoral position

The Physics Department of the Camerino University (Italy) is seeking motivated candidates for a Post-doctoral position.

Prospective candidates should have a PhD in physics (or completed within the end of 2008) or related field, experience in ultrafast and X-ray techniques is highly desirable. This will be a 1-year contract, renewable up to 3 years (current salary is around 20 kEuro/year, depending on previous experience and qualifications).

Good oral and written communication skills in English are essential, while knowledge of the Italian language is not required.

The successful candidate will join the XAS group (<http://gnxas.unicam.it>), collaborating to the TIMEX project, recently funded through a collaboration with the ELETTRA synchrotron radiation facility in Trieste.

The short term aim of the project is to develop an end-station for pump&probe ultrafast experiments of matter under extreme conditions, using the forthcoming Fermi@ELETTRA free-electron laser source.

The work will consist in the performance of pilot experiments and development of basic experimental set-up.

Camerino University is a recognized scientific institution, one of the oldest in Italy and is located in beautiful natural environment. More information can be found at <http://www.xafs14.it/location.html> and <http://www.unicam.it>.

Further information requests or applications (including a CV with list of publications and the names of two referees) should be sent to Andrea Di Cicco (andrea.dicicco@unicam.it) and will be considered immediately until the position is filled.

The expected starting date of the contract is 1st-30 November 2008.
